### **Read this before you begin!**

Proper installation of this product is critical to its functionality and should only be done by a professional shop. Brey-Krause Manufacturing shall not be held responsible for injury, death, vehicle damage or other damage resulting from the use or misuse of our products.

## INSTALLATION INSTRUCTIONS

### Step 1

Remove the plastic caps covering the front seat track bolts. Remove the two front seat rail mounting bolts. Note: you will need a 12mm internal star pattern wrench to remove this.

### Step 2

Remove the clamp from the fire extinguisher. Using the supplied #10-24 screws and nuts, bolt the clamp to the Brey-Krause mounting bracket. This step must be performed before the assembly is installed in the car.

### Step 3

Slide the tabs of the mounting bracket under the front driver seat tracks. Push the bracket as far towards the back of the car as it will go and bolt it in place using the factory bolts removed in step one.

### Step 4

Clamp the fire extinguisher in place. Installation is now complete.
